Contact adhesive SuperX 1

TECHNICAL DATASHEET

Status 25.06.2020

Item no.: S02830290

PROPERTIES

Contact adhesive SuperX 1 is a top quality, highly elastic and versatile gluing and sealing compound. It is suitable for bonding hydrophilic strips to concrete and steel, for sealing joints in sanitation facilities, for connection joints in buildings, for sealing glass, for joints in body and container construction, for PS and PU foam panels, for wooden constructions, for plastic claddings and for aluminium profiles.

Contact adhesive SuperX 1 is suitable for damp and dry surfaces.

Due to its stability the installation of **Contact adhesive SuperX 1** can be realized overhead as well as in the vertical sense.

APPLICATION

Generally on non-porous surfaces **Contact adhesive SuperX 1** guarantees an excellent adherence, a permanent elasticity, a high traction and a speed curing time.

TECHNICAL DATA

Density:	1.54 g / cm³
Curing time:	3 mm in 24 hours
Skin formation:	after appr. 10 – 15 minutes
Shore A-hardness:	60
Tensile strength:	2.2 MPa (after DIN 53504)
Temperature resistance:	-40 °C / +100 °C

PACKAGING & STORAGE

290 ml - cartridge   box: 12 cartridges

Contact adhesive SuperX 1 can be stored in the original unopened packaging for at least 12 months at temperatures between +5 ºC and
+25 ºC.

INSTALLATION

The adhesive is applied either with a handgun or a pressurised gun. It is applied in vertical, snaking lines to clean surfaces that are free of dust and grease. The content of the cartridge is sufficient for approx. 8-10 m of hydrophilic strip.

Processing temperature is between +5 °C and +30 °C (construction temperature).
